

# MICROSOFT 365

Why choose **Microsoft 365** for your **Modern Workplace**

Considering an upgrade to cloud-based productivity tools? Here are a few reasons why enterprise organizations of all sizes prefer **Microsoft 365**.

Microsoft 365 empowers every employee from your firstline workforce all the way to your boardroom. Our subscriptions offer complete, intelligent, and more secure solutions that will bring more value to your business and help transform your organization to drive innovation.

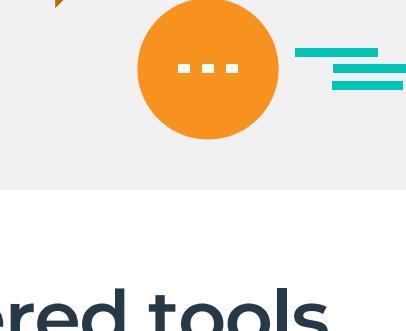

## Deliver familiar Office apps across mobile, web, and PC

Microsoft 365 offers familiar Office apps you know and love like Word, Excel and PowerPoint on both your favorite device and in the browser with real-time co-authoring. Rich mobile apps also help you get work done from virtually anywhere, available on your platform of choice.

## Introduce new ways to work with experiences like Microsoft Teams

Unlike other cloud-based productivity suites, Microsoft 365 offers Microsoft Teams, a shared workspace where you can chat, meet, share files, and work with business apps. It also delivers live and on-demand events, open community dialogues and scale communication tools to connect and engage organizations.

## Amplify human ingenuity with AI-powered tools

Co-authoring and web apps are not enough to fuel innovation. Microsoft 365 comes with built-in AI and intuitive analytics capabilities to help unlock data-driven insights, augment human capabilities, help ensure inclusive work environments and drive organizational and behavioural change.

## Trust that your data is secure and compliant

When you place your trust in a cloud service provider, security, compliance, privacy and data protection are top of mind. With over a billion customers and decades of experience running online services, we understand what it takes to earn and continue to maintain your trust and confidence in our cloud.

## Deliver familiar Office apps across mobile, web and PC

**Desktop versions of Office applications<sup>1</sup>** on PC or Mac

**Web versions** of Microsoft Word, PowerPoint, Excel, and OneNote

**Best-in-class mobile apps** optimized for mobile phones and tablets
